

Clinical Mastery

Presented by *Gold Dust*

Ultimate Occlusion - Level 2

Description: This course was developed for the clinician who desires to master successful treatment planning for patients presenting complex occlusions, including partially edentulous, stepped occlusions and full mouth reconstruction. This 2 1/2 day program will provide an interactive, advanced occlusion experience with a focus on treatment planning and case presentations.

Course Objectives:

- Participants will successfully treatment plan and present to their peers three cases with complex occlusions
- Participants will be able to provide patients with a phased plan for treatment to match their economic limitations
- Participants will be able to predict restorative outcomes with the use of splints and orthotics in case management
- Participants will be provided hands on overview of advanced instrumentation and diagnostics -- including joint, muscle and teeth analysis
- Participants will learn advanced principles of equilibration with an in depth study of when, where and how to equilibrate.
- Participants will observe case presentation techniques for a variety of clinical conditions and patient circumstances

Tuition: \$2900

Sign up by December 31, 2011 and receive a \$400 discount off the program
