# Ultimate Occlusion Series

John Nosti DMD,  
FICOI, FAGD, FACE

Michael Smith,  
DMD

Lee Ann Brady,  
DMD

## Mastering Functional Dentistry: **Ultimate Occlusion Level 1**

This two day hands-on course is designed to be the most practical application of occlusion philosophies for every day dentistry, as well as cosmetic restorative cases. This scientifically based program is designed to enable practitioners to incorporate occlusal stability in their single tooth, quadrant and more complex dentistry. This program is segmented into specific steps to follow during the process of evaluating a patient, formulating a treatment plan, and determining the specific procedural approach. Eliminate common failures by learning the following:

- Diagnostic chairside red flags to avoid failures and poor treatment choices
- Understand what determines occlusion, and when and why occlusal changes are required
- When to order additional diagnostics to determine appropriate treatment protocols
- When, why and how to deprogram patients to set up appropriate records
- Preparation design for functional and cosmetic cases, including veneers
- Ideal material selection, and cementation options for specific cases
- Principles and techniques for successful equilibration
- Understand TMD Classification.
- Successfully communicate occlusal disease to your patients
- Determine the cause of "wear" including attrition, erosion, and the cause of each.
- Understand Function vs Parafunction
- Hands-on diagnostics and record taking: CR recording, Facebow, MAP Study Model Analysis

**Dates:** *October 2, 3 2015 - Englewood Cliffs, NJ*  
*January 22, 23 2016 - Tempe, AZ*  
*March 4, 5 2016 - Houston, TX*  
*May 20, 21 2016 - Boston, MA*  
*September 23, 24 2016 - Nashville, TN*

**CE Credit Hours:** 16

**Tuition:** \$2500 per doctor, \$595 per staff member

## Mastering Complex Cases: **Ultimate Occlusion Level 2**

### CONTINUED TRAINING:

- When and how to change VDO in full arch, and full mouth cases.
- Necessary use of advanced instrumentation and diagnostics to determine stability -- including joint, muscle and teeth analysis
- Hands-on application and fabrication of routine splints
- Hands-on case treatment planning and case presentation workshops
- Case presentation skills to advanced your treatment plan acceptance
- Increase success of your restorative outcomes with the use of splints and orthotics in case management
- Preparation design, Material selection, Treatment sequence, and Cementation options

**Dates:** *February 12 - 14 2016 - Atlanta, GA*  
*August 5 - 7 2016 - Seattle, WA*

**CE Credit Hours:** 20

**Pre-requisite:** Mastering Functional Dentistry

**Tuition:** \$3295 per doctor, \$595 per staff member

## Mastering Full Mouth Reconstruction: **Ultimate Occlusion Level 3**

### CONTINUED TRAINING:

Go to [www.clinicalmastery.com](http://www.clinicalmastery.com) for details!

**Dates:** *November 13, 14 2015 - Las Vegas, NV*  
*November 11, 12 2016 - Las Vegas, NV*

**CE Credit Hours:** 16

**Tuition:** \$3295 per doctor

**Pre-requisite:** Mastering Functional Dentistry

Space is limited! Call Today **480-489-5551** or visit us online at [www.clinicalmastery.com](http://www.clinicalmastery.com)

# Advanced Treatment Planning Workshop

## ADVANCED TREATMENT PLANNING

Join Drs. Brady, Nosti, Olitsky and Smith as they host dentistry's most exciting treatment planning workshop!! The greatest challenge as general dentist is developing a plan for your patients that fits their goals and budgets, without missing opportunities. The variety of treatment options can be overwhelming and how to present those options confounding. From routine to very complex cases, this course simulates the process and the "how-to" system of taking a case from diagnostics to presentation and allows you to put into practice what you learn — at the course.

This HANDS-ON experience allows you to learn strategies for effective treatment planning on a variety of restorative cases. With more than eight cases you will learn a predictable system for treatment planning even the most complex case. This interactive experience will put your skills to the test and provide rationale and great discussion that will put philosophy into practice. Think LIVE case treatment planning on complex situations that will challenge you and provide practical hands on support of a treatment planning and case presentation process. Full Mouth Rehabilitations, aesthetically driven cases, complex reconstruction and severe wear will be examples of cases that you will achieve confidence in your treatment decisions, all while collaborating with the wet-fingered masters in practical, restorative dentistry.

There is no other course in dentistry that has panel of talent like these educators. The knowledge and dedication to your personal learning objectives is unparalleled!

**Dates:** September 11, 12 2015 - Phoenix, AZ  
April 15, 16 2016 - Philadelphia, PA  
October 7, 8 2016 - Dallas, TX

**CE Credit Hours:** 16 Units  
**Tuition:** \$3995 per doctor

# Over the Shoulder

## Full Mouth Rehabilitation Demonstration Program

with John Nosti, DMD, FICOI, FAGD, FACE

**The Goal:** This 2 weekend, 4 day demonstration and lecture program allows attendees to experience side by side learning with Dr. John Nosti, as he diagnoses, treatment plans, prepares, provisionalizes, and cements a Full Mouth Rehabilitation. Participants will have the opportunity to work in a small group atmosphere to absorb the particulars of the thought process, treatment steps and patient management of complex cases. Two full days of lecture, with hands-on segments, case treatment planning and clinical observation.

September 25, 26 and October 16, 17 2015 - Englewood Cliffs, NJ

September 9, 10 and September 30 - October 1 2016 - Chicago, IL

### Learning Objectives:

- Learn a predictable system for screening complex cases for joint, tissue, occlusal and aesthetic concerns
- Observe and practice bite records necessary for completing a full mouth rehabilitation
- Understand how to sequence the preparation and temporization phase of a full mouth rehabilitation
- Observe a step-by-step process of predictable cementation
- Learn two different styles of provisionalization that achieve temporaries that will last
- Practice and learn the camera settings and techniques for great intra-oral photos
- Master a facebow and stick bite record while understanding their value to the result of the restorative case
- Improve lab communication with submitting exactly what's necessary
- Participate in case planning workshops and skills testing
- Develop a patient protocol for rehabilitations from case presentation to post cementation

**Tuition:** \$4,795 per attendee

**CE CREDIT HOURS:** 32 units

**John Nosti DMD,  
FICOI, FAGD, FACE**

Immediate post insertion and laser tissue re-contouring.

*Space is limited to 15 attendees!  
Don't wait to enroll, this course will sell out fast.*

# ANTERIOR AESTHETICS LIVE: PREDICTABLE FUNCTION, BEAUTIFUL FORM

Experience a live patient, over-the-shoulder program with Dr. Jason Olitsky, an AACD Accredited Member and premier cosmetic dentist in smile design and transformations utilizing state-of-the-art materials. Dr. Olitsky gives presentations filled with high impact video and captivating images as he reinforces the importance of making emotional connections with our patients throughout the smile design process.

## IN THIS JAM-PACKED 2 DAY EVENT, YOU WILL:

- Observe and discuss a live 8 to 10 unit anterior case from planning to preparation and provisionalization
- Observe and discuss a live 8 to 10 unit anterior bonded cementation from removing temporaries to case finishing
- Learn efficient clinical systems to reduce chair time and treatment costs while improving patient satisfaction
- Learn conservative prep design and material selection to achieve outstanding results
- Experience stress-free bonded cementation and case finishing that will increase longevity and eliminate failures
- Understand the psychology of marketing and case presentation for the aesthetically focused patient
- Review in detail key principles of smile design to communicate with the patient and dental team
- Understand the role of face bows, bite records and mock-ups in controlling case outcomes
- Be introduced to concepts of Digital Smile Design
- Learn photographic principles as a prerequisite to delivering stunning results

## YOU WILL RECEIVE:

- Step by step preparation guide
- Step by step cementation guide
- Comprehensive list of materials and ordering information
- "The Naked Tooth: What Cosmetic Dentists Don't Want You to Know" - consumer book on cosmetic dentistry written by Drs. Colleen & Jason Olitsky

**Over the Shoulder Program:  
Jason Olitsky, DMD, AACD**  
Anterior Aesthetics Live  
**Tuition: \$3295**  
**CE Credit Hours: 16 Units**

March 11, 12 2016 - Miami, FL  
October 14, 15 2016 - Englewood Cliffs, NJ

**SPACE IS LIMITED!!**

480-489-5551 or email [jenn@clinicalmastery.com](mailto:jenn@clinicalmastery.com)

## MASTERING **IMPLANT** PROSTHETICS

### **Course Instructors: Lee Ann Brady, DMD and Specialist Dr. David Barget**

*Have you ever seated an anterior implant crown that looked perfect only to have 2mm recession occur a few years down the road? Do you know the when, where, and why of custom implant impression copings? Do you know the when, where, and why of custom healing abutments? Have you been able to successfully communicate with your surgeon an ideal implant placement position that would be more predictable for the soft tissue appearance long term? Do you know an easy way to fabricate an immediate temporary?*

### **Learn the fundamentals of restorative success - both aesthetically and functionally!**

As one of the fastest growing aspects of dentistry, dental implants are becoming a standard of care for every day tooth replacement. While only 4% dental implant fixtures fail, there are a much higher percentage of cases that are aesthetically or otherwise compromised. Learn the essentials in driving success, predictability and ease of restoration hands-on with clinicians who are the leaders in their field. There is no substitute for learning in a live patient, hands-on environment. Observe, question, participate all in a clinical setting with clinicians gifted and experienced with the latest advancements in dental implantology.

Whether you have limited experience restoring implants or want to streamline your process, this course will ultimately increase your confidence, acceptance and expertise.

**TWO DAY, HANDS-ON OVER-THE-SHOULDER Course - 1/2 day lectures and 2 LIVE PATIENT AFTERNOONS. NOT A SURGICAL COURSE.**

### **YOU WILL LEARN:**

- How to integrate dental implants into your restorative treatment plans
- Avoid common failures and aesthetic compromises in your final restorative phase
- Identify different systems, fixtures and implant parts
- Utilizing selection criteria to determine implant abutment, restorative materials and final restoration
- Optimize implant provisionalization to ensure ultimate restorative success
- Pre-operatively plan requirement for bone or soft tissue augmentation
- Appropriately estimate and present fees for implant procedures
- Learn the advances in technology to improve placement and condense the timing and appointments of implant cases
- Learn what your specialist needs and how to quarterback the treatment plan for optimum results

**Creating the difference between acceptable and exquisite.**

**Tuition: \$3595**

**CE Credit Hours: 18 Units**

**Dates:** December 4, 5 2015

December 2, 3 2016

June 3, 4 2016

**Location: Glendale, AZ**

# THE ART OF PHOTOGRAPHY

*Techniques for Exquisite Clinical and Portrait Photographs*

## THE GOAL:

Learn the skills and techniques needed to incorporate photography into your practice. This course will show you how to take and manage high quality digital or film photographs in promoting, documenting, evaluating and communicating the key elements of aesthetic dentistry. An easy to understand system of how to use photography to get better aesthetic results will be presented, that can be immediately implemented into your practice. Get educated on the most current technical trends in equipment and lighting that makes images look extraordinary. Dr. Olitsky will demonstrate how to use high impact DSLR video and photography to make emotional connections with our patients. Also perfect for the specialists and team to learn to incorporate quality images.

## TWO DAY HANDS-ON COURSE: MORE THAN 5 HANDS-ON HOURS!

This 2 day hands-on course includes workshops to implement the clinical intra oral skills necessary as well as developing the fundamentals to include photography as a vital part of your practice promotion.

## YOU WILL LEARN:

- Basic photography skills with breakout sessions that will enable you to manually control the camera in natural light situations
- Hands-on practice capturing standardized views with various clinical lighting techniques and equipment
- Hands-on portrait photography workshop with both full studio lighting set-ups for larger spaces and simple light set-ups for offices without space for a dedicated studio
- Tips and tricks on utilizing photography for laboratory communication from matching single incisors to full mouth rehabilitations
- The most current techniques in dental photography and lighting that will make your pictures stand out and your dentistry look extraordinary
- How to integrate DSLR video and Digital Smile Design techniques into presentation and communication with the patient, laboratory and restorative team
- Intra-oral tips and strategies for quality images in **Invisalign™** treatment and **AAACD** accreditation
- How to get predictable results every time!
- Make ordinary people look and feel extraordinary. You will explore different poses, lighting and props.

## DATES AND LOCATION:

July 31 - Aug 1 2015 - San Francisco, CA  
November 13, 14 2015 - Las Vegas, NV  
March 4, 5 2016 - Houston, TX  
August 5, 6 2016 - Seattle, WA  
September 23, 24 2016 - Nashville, TN
