

MASTERING **IMPLANT** AESTHETICS

Course Instructors: Lee Ann Brady, DMD and Specialist Dr. David Barget

Have you ever seated an anterior implant crown that looked perfect only to have 2mm recession occur a few years down the road? Do you know the when, where, and why of custom implant impression copings? Do you know the when, where, and why of custom healing abutments? Have you been able to successfully communicate with your surgeon an ideal implant placement position that would be more predictable for the soft tissue appearance long term? Do you know an easy way to fabricate an immediate temporary?

Learn the fundamentals of restorative success - both aesthetically and functionally!

As one of the fastest growing aspects of dentistry, dental implants are becoming a standard of care for every day tooth replacement. While only 4% dental implant fixtures fail, there are a much higher percentage of cases that are aesthetically or otherwise compromised. Learn the essentials in driving success, predictability and ease of restoration hands-on with clinicians who are the leaders in their field. There is no substitute for learning in a live patient, hands-on environment. Observe, question, participate all in a clinical setting with clinicians gifted and experienced with the latest advancements in dental implantology.

Whether you have limited experience restoring implants or want to streamline your process, this course will ultimately increase your confidence, acceptance and expertise.

TWO DAY, HANDS-ON IN-THE-OP Course - 1/2 day lectures and 2 LIVE PATIENT AFTERNOONS. NOT A SURGICAL COURSE.

YOU WILL LEARN:

- How to integrate dental implants into your restorative treatment plans
- Avoid common failures and aesthetic compromises in your final restorative phase
- Identify different systems, fixtures and implant parts
- Utilizing selection criteria to determine implant abutment, restorative materials and final restoration
- Optimize implant provisionalization to ensure ultimate restorative success
- Pre-operatively plan requirement for bone or soft tissue augmentation
- Appropriately estimate and present fees for implant procedures
- Learn the advances in technology to improve placement and condense the timing and appointments of implant cases
- Learn what your specialist needs and how to quarterback the treatment plan for optimum results

Creating the difference between acceptable and exquisite.
