Mastering Functional Dentistry: Ultimate Occlusion Level 1

This two day hands-on course is designed to be the most practical application of occlusion philosophies for every day dentistry, as well as cosmetic restorative cases. This scientifically based program is designed to enable practitioners to incorporate occlusal stability in their single tooth, quadrant and more complex dentistry. This program is segmented into specific steps to follow during the process of evaluating a patient, formulating a treatment plan, and determining the specific procedural approach. Eliminate common failures by learning the following:

- Diagnostic chairside red flags to avoid failures and poor treatment choices
- Understand what determines occlusion, and when and why occlusal changes are required
- When to order additional diagnostics to determine appropriate treatment protocols
- When, why and how to deprogram patients to set up appropriate records
- Preparation design for functional and cosmetic cases, including veneers
- Ideal material selection, and cementation options for specific cases
- Principles and techniques for successful equilibration
- Understand TMD Classification.
- Successfully communicate occlusal disease to your patients
- Determine the cause of “wear” including attrition, erosion, and the cause of each.
- Understand Function vs Parafunction
- Hands-on diagnostics and record taking: CR recording, Facebow, MAP Study Model Analysis

Dates: September 15, 16 2017 - Dallas, TX
November 3, 4 2017 - Delray Beach, FL
January 19, 20 2018 - Phoenix, AZ
March 2, 3 2018 - Boston, MA
June 8, 9 2018 - Chicago, IL

CE Credit Hours: 16
Tuition: $2500 per doctor, $595 per staff member*

Pre-requisite: Mastering Functional Dentistry

Mastering Complex Cases: Ultimate Occlusion Level 2

CONTINUED TRAINING:
- When and how to change VDO in full arch, and full mouth cases.
- Necessary use of advanced instrumentation and diagnostics to determine stability -- including joint, muscle and teeth analysis
- Hands-on application and fabrication of routine splints
- Hands-on case treatment planning and case presentation workshops
- Case presentation skills to advanced your treatment plan acceptance
- Increase success of your restorative outcomes with the use of splints and orthotics in case management
- Preparation design, Material selection, Treatment sequence, and Cementation options

Dates: August 4 - 6 2017 - Englewood Cliffs, NJ
February 9 - 11 2018 - Houston, TX
August 17 - 19 2018 - Philadelphia, PA

CE Credit Hours: 20
Tuition: $3495 per doctor, $595 per staff member* 

Pre-requisite: Mastering Functional Dentistry

Mastering Full Mouth Reconstruction: Ultimate Occlusion Level 3

CONTINUED TRAINING:
